

Stay Ahead of the Mission

Merge Digital Innovation with Real-World Training

In a rapidly advancing defense landscape, mission readiness demands innovative training solutions. GovCIO delivers cutting-edge augmented and virtual reality (AR/VR) training systems that prepare operators and maintainers to face evolving threats with confidence.

Our modular and scalable systems immerse trainees in realistic simulations, enhancing their readiness for complex and dynamic challenges. By bridging technology with mission-focused learning, GovCIO ensures your team is always prepared to meet the mission head-on.

Revolutionizing Navy Training with AR Technology

Transforming training for the Navy, we integrated Augmented Reality (AR) into the digital Rate Training Manual (RTM) for the new Cryptologic Warfare Technician (CWT) rate. Our developers successfully launched this new feature through the CIWT Knowledge Portal App, successfully passing its initial Alpha test.

Using Agile Sprints, our team developed curricula tailored to today's tech-savvy sailors in alignment with the Navy's Ready Relevant Learning (RRL) mission. Backed by an effective Quality Assurance Management Plan (QAMP), we've achieved 100% Alpha Review acceptance for CIWT RTM task orders since 2022, reducing review time and costs.

Since 2019, our staff has successfully completed all RTM and OTM conversions for CIWT, delivering innovative, reliable, and mission-ready training solutions.

A GovCIO VR Experience: Night at the Cryptologic Museum

Night at the Cryptologic Museum is our innovative VR project created for the US Navy Cryptologic Veterans Association. This immersive experience features a 360-degree interactive tour of the Command Cryptologic Display at Corry Station. Designed to push the boundaries of training capabilities, this VR project allows users to explore the rich history of Navy cryptology in an engaging, fully immersive environment. By blending cutting-edge technology with educational storytelling, this experience showcases the potential of VR to enhance learning and preserve legacy.

Explore A Night at the Cryptologic Museum

Scan the QR code to journey into the US Navy Cryptologic Veterans Association. You'll be guided to interact with arrows or information buttons to navigate the space. Explore the area, turn on the lights, sign the guest book, and discover more about the items on display within the space.

GovCIO is a rapidly growing provider of advanced technology solutions and digital services for the federal government. Combining our extensive federal experience with the latest innovations in IT and disruptive approaches, our experts develop comprehensive solutions to meet the most pressing demands of today's government agencies. From the U.S. military to Health and Human Services, we have an impressive track record of helping our customers optimize how they operate. We're transforming government IT, empowering our federal customers to meet the challenges of today while building the government of tomorrow.
